Landscape Concept

The Wall is an important element for the design of the Prince Salman Science Oasis. Starting on an artificial gap on Prince Abdullah bin Abdulaziz Road, the Wall eases the visitors to the central Plaza with the main entrance to the Science Center and Wall. Short paths with palm trees guide to the landscaped gardens, where the Wall exhibits its character as a dry river bed.

The Oasis Gardens are not only a landscaped park but also the outdoor exhibition area of the Science Center. Palm carpets shaded by palm trees near the river create a cool area and create spaces for recreation surrounded by agricultural activities, exposed rock formation and spectacular scenery.
